Biography

Gene Wang
Chief Executive Officer
People Power Company

Gene Wang is CEO and co-founder of People Power, an award-winning software company enabling remote control and management of connected devices from your smart phone. People Power's groundbreaking smartphone app, Presence, transforms spare iPhones, iPads, and iPods into wireless video cameras with motion detection video alerts for free home monitoring. Presence expands to control smart plugs to manage power, robotic stands so you can look around while remote, and other sensors to improve safety, convenience and save you money. People Power's mobile-and-cloud Internet of Everything Architecture enables service providers and manufacturers to deliver smart home solutions to improve security, energy management and home automation.

Gene was previously Chairman and CEO of Bitfone, an industry leader in mobile phone device management, which he sold to HP in 2007 for $160M. Gene was CEO and Chairman of Photo Access, which sold to Agilent in 2000. Gene was CEO of Computer Motion, a leader in medical robotics, which he led through a successful IPO in 1997. At Symantec, Gene was Executive VP where he managed four divisions and helped grow the annual sales from $172 million to $412 million. Gene was VP and general manager at Borland, where he drove sales of the C++ programming language to over one million copies. Gene was co-founder and VP Marketing at Gold Hill Computers, an Artificial Intelligence company. Gene earned a bachelor's degree in computer science from the University of California at Berkeley.
